“When I had first met GrowMyHVAC at the ASHRAE convention in New York, I was already a process-driven and highly motivated small business owner. In addition to having created multiple processes and procedures for my small HVAC business in eastern Pennsylvania, I also was a member of a different organization that has similar goals as Growmyhvac.com like the Everest Group. Fortunately for me and my company, GrowMyHVAC was able to demonstrate several key areas where we could improve. Through my assigned coach’s personal, hands-on approach I was able to shore up several of my selling and administrative processes to deliver not only better value to my customers, but an overall better value for me and my employees. I highly recommend GrowMyHvac.com and Wendell for the vast amount and depth of knowledge and tools necessary to implement a winning strategy for a small HVAC company.”

“This Goodman brands dealer website is the best thing since pockets were put on t-shirts. I’m serious! You provided me with thousands of dollars in costly website services and working with people where I had to do all the content work myself. The best part is you also provided me with a proven consumer friendly 27-page website design with built-in organic SEO, FREE special offer updates, and ongoing reliable hosting services.”

“Your price books and proven business processes and forms pulled me out of bankruptcy, freed up more time for me and my

family, and now even after the market crashed – is making me much more money. The GrowMyHVAC.com business fitness education center is a no brainer.”

“We have recently implemented the Goodman Flat Rate books set and call handling systems from GrowMyHVAC. Our average ticket is well over \$750. Our average closing ratio is well over 90% on repairs. Our top technician averages over \$10000 between repairs, upgrades, and up sells. I have not had 1 complaint about the process, the price, or the presentation. We close 8 out of 10 on Comfort Club memberships offers. Simply put, the system we have going with GrowMyHVAC is the best I have seen, and their step by step processes and procedures have changed our company completely. The amazing support, insight, and training behind the already great product makes it a no brainer.”

“I came across GrowMyHVAC about a year ago. It wasn’t until about 6 months ago that I decided to invest in growing my business and subscribed to get things going. Right away price books for service calls and equipment replacements were developed. My website, which I couldn’t imagine setting up for a couple years was completed within the first 2 weeks. A process for handling service calls and equipment replacements was already in place. From Daikin ductless split systems to Goodman gas furnaces my equipment pricing books are right on target, it also has great pictures for the customer to see. Scripts for answering the phone, processes for

Contractors

dispatchers to follow and steps for technician to complete on a routine service call we there. All of this would have taken me years to create, now I have them all and training to go with it.”

“Our Goodman flat rate price book set from GrowMyHVAC is wonderful. The cost of the Goodman program is more cost effective than other price book programs. Billing the customer is one less hassle that we have to worry about. The customer agrees to the price before we start work, and the prices are clearly defined in each section. Our company saw an increase in revenue immediately.”

“GrowMyHVAC has certainly helped bring my business to the next level. Being able to customize many of the procedures and protocols they have in their database to the individuality of my own business has saved me countless hours of work and research. The training sessions with my personal Coach have proven to be very useful as we work to structure our business around many of their programs, including residential flat rate pricing and the commercial sales program. The cost for the program is far exceeded by their ability to adapt to any situation or HVAC business, be it large or small. I highly recommend GrowMyHVAC for any business looking to expand their bottom line and organize their company.”

“I looked at all of the major consulting services, and felt that GrowMyHVAC offered the best value. We're using his Goodman flat rate service, flat rate installation price books and other Ready-Built HVAC professional business processes and practices. My assign coach is very responsive, and was adaptive to some of our unique business needs. We view their services as complete business system and an affordable alternative to a franchise.”

"I would like to commend Growmyhvac for focusing on the trades industry and giving contractors the resources that we hear so often we need but didn't know how to put it all together. It has been for our company a great way to boost our SEO on the web, to give our techs in the field accurate on site pricing for system replacement and Growmyhvac has also provided training to our whole staff in the art of selling and creating within our company a pride that says we are worth what we charge. I highly recommend Growmyhvac for any of the trades who are looking to up their game.
